EDUCATION

Ontario Tech University

Bachelor of Science (Honours) in Computer Science

- **Relevant coursework:** Data Structures & Algorithms, Operating Systems, Computer Networks, Database Systems.

Expected: May 2028

Oshawa, ON

Centennial College

Software Engineering Technology Advanced Diploma | Honours Scholar - GPA: 4.295 / 4.5

Jan 2023 – Dec 2025

Scarborough, ON

EXPERIENCE

Technical Customer Service Representative

Able I.T Solutions

- Resolved **20–40 client issues** daily with a **92% resolution rate** via structured troubleshooting workflows and communication
- **Eliminated 2 hrs/shift** of manual triage by **building an AI pipeline** that ranked tickets by severity with auto-synopses
- Improved support coverage across **20+ software tools** by quickly learning new systems and cross-platform diagnostic techniques

May 2023 – Present

Scarborough, Ontario

Software Engineer Intern

TheCodeCrackers Inc.

- Authored automated Postman test plans **validating 2,000+ REST APIs**, logging and tracking all defects end-to-end in **Jira**
- Engineered a **3-agent Claude AI debugging pipeline** (assess, diagnose, fix) that caught **50+** production bugs before release
- Participated in **team code reviews**, giving and receiving feedback on testability and edge case coverage within **agile** sprints

May 2025 – Aug 2025

Vaughan, ON

Junior Front End Developer / Pharmacy Assistant

Remedy'sRx

- Proactively improved **legacy Angular POS** workflow, boosting responsiveness by **25%** and reducing checkout steps from **5 to 3**
- Maintained **100%** prescription accuracy supporting pharmacists with data entry and verification in a regulated environment
- Handled **35+** daily patient inquiries while maintaining **clear, compliant communication** and dependable front-line service

Feb 2022 – May 2023

Scarborough, ON

PROJECTS

Projects by the Projects | *React, Spring Boot, PostgreSQL, Stripe, Cloudflare*

ProjectsXProjects.ca

- Built and scaled a **full-stack** nonprofit platform serving **125+ subscribers** and facilitating **\$50K+ in donations** across projects
- Built **Stripe + Spring Boot** payment workflows with **99.6%** success-rate transactions and reliable real-time donation handling
- Shipped production **React + REST API** features improving page load by **30%** and reducing admin workload by **40%**

MyE46 | *React Three Fiber, Three.js, Express.js, Zustand, Gemini API*

MyE46.app

- Launched an **Agentic 3D car configurator** reaching **500+** users on week one, with real-time part swapping, color, ride height
- Fixed GPU overload from **200 users** by designing a 3-tier adaptive rendering system, cutting GPU usage from **90%** to **15-30%**
- Built an **Agentic AI** advisor with **SSE streaming**; users describe mods in plain English and see live budget-aware car updates

ASL Hand Coach | *React, TypeScript, Google MediaPipe, Tailwind CSS*

ASLHandCoach.ca

- Built a browser-based app recognizing **36 ASL** fingerspelling signs from live camera input with **sub-200ms** feedback latency
- Achieved **90%** recognition accuracy across 36 signs (A–Z, 0–9) by tuning landmark geometry thresholds and finger-state heuristics

MorseBridge (Apple SSC Hackathon) | *SwiftUI, iOS/iPadOS*

[GitHub Source Code](#)

- Built an **interactive mobile app** teaching Morse code letters and numbers with **multimodal** feedback: sound, vibration, visual
- Designed guided learning and quiz flows with **responsive SwiftUI** components and offline-first interaction design for **accessibility**

LEADERSHIP EXPERIENCE

Chief Technology Officer (CTO) | *Projects by the Projects*

Jan 2025 – Present

- Led **technical planning** for community nonprofit, defining platform needs, prioritizing features, and guiding **software initiatives**
- Contributed to **campaign strategy** by identifying projects and causes that connect community needs with **actionable solutions**

TECHNICAL SKILLS

Languages: Java, Python, TypeScript, JavaScript, C++, C#, SQL, Swift, Bash/Shell

Frameworks: React, Next.js, Node.js, Express.js, Spring Boot, Flask, .NET, Angular, SwiftUI, Three.js / React Three Fiber, MediaPipe, Tailwind, Pandas, NumPy, JUnit

Developer Tools: Git, Docker, Postman, Jira, AWS, Azure, PostgreSQL, Cloudflare, Android Studio, SQL Developer, Linux/Unix, Visual Studio Code, PyCharm, IntelliJ, Figma, Render, Vercel, Firebase

Concepts: Data Structures & Algorithms, REST API Design, Microservices, CI/CD, Computer Vision, AI Agents & Automation, Multithreading & Concurrency, System Design
